GR86 ACTIVE SAFETY SUITE

unleash your drive with a peace of mind.

Pre-collision System [PCS]

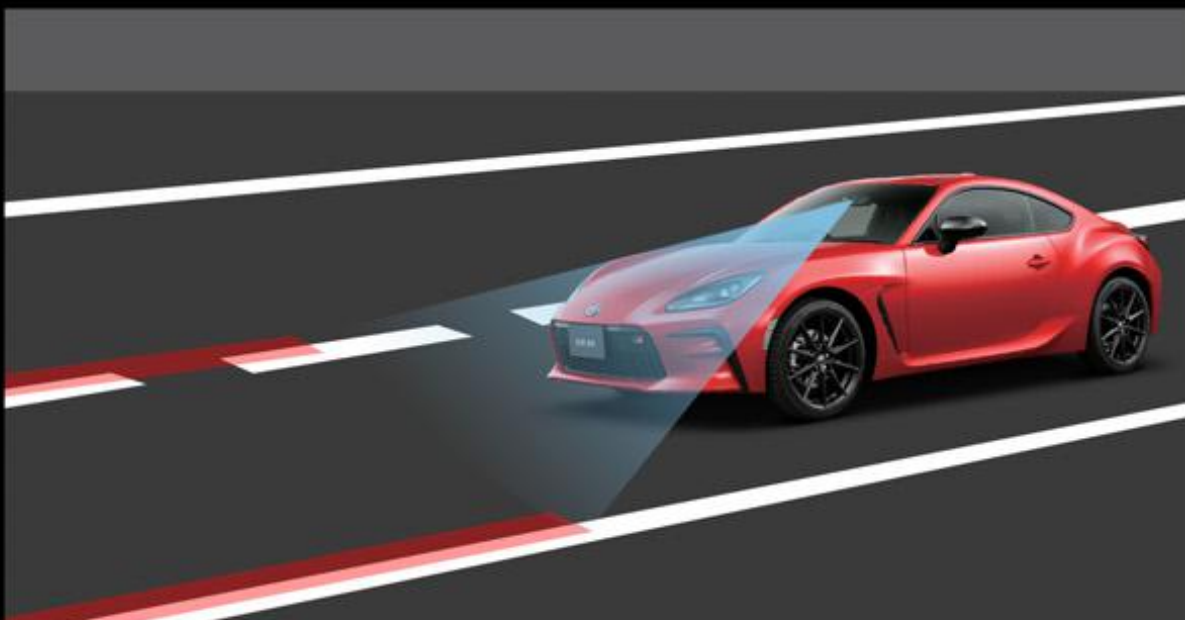

Avoids or mitigates frontal collisions by using an in-vehicle stereo camera sensor to monitor the road ahead while detecting vehicles, pedestrians and cyclists.

Adaptive Cruise Control [ACC]

Designed to adjust your speed, helping you maintain a preset distance from the car in front of you.

Lane Departure Alert [LDA]

Alerts the driver when the vehicle moves away from a traffic lane without signalling.

Automatic High Beam [AHB]

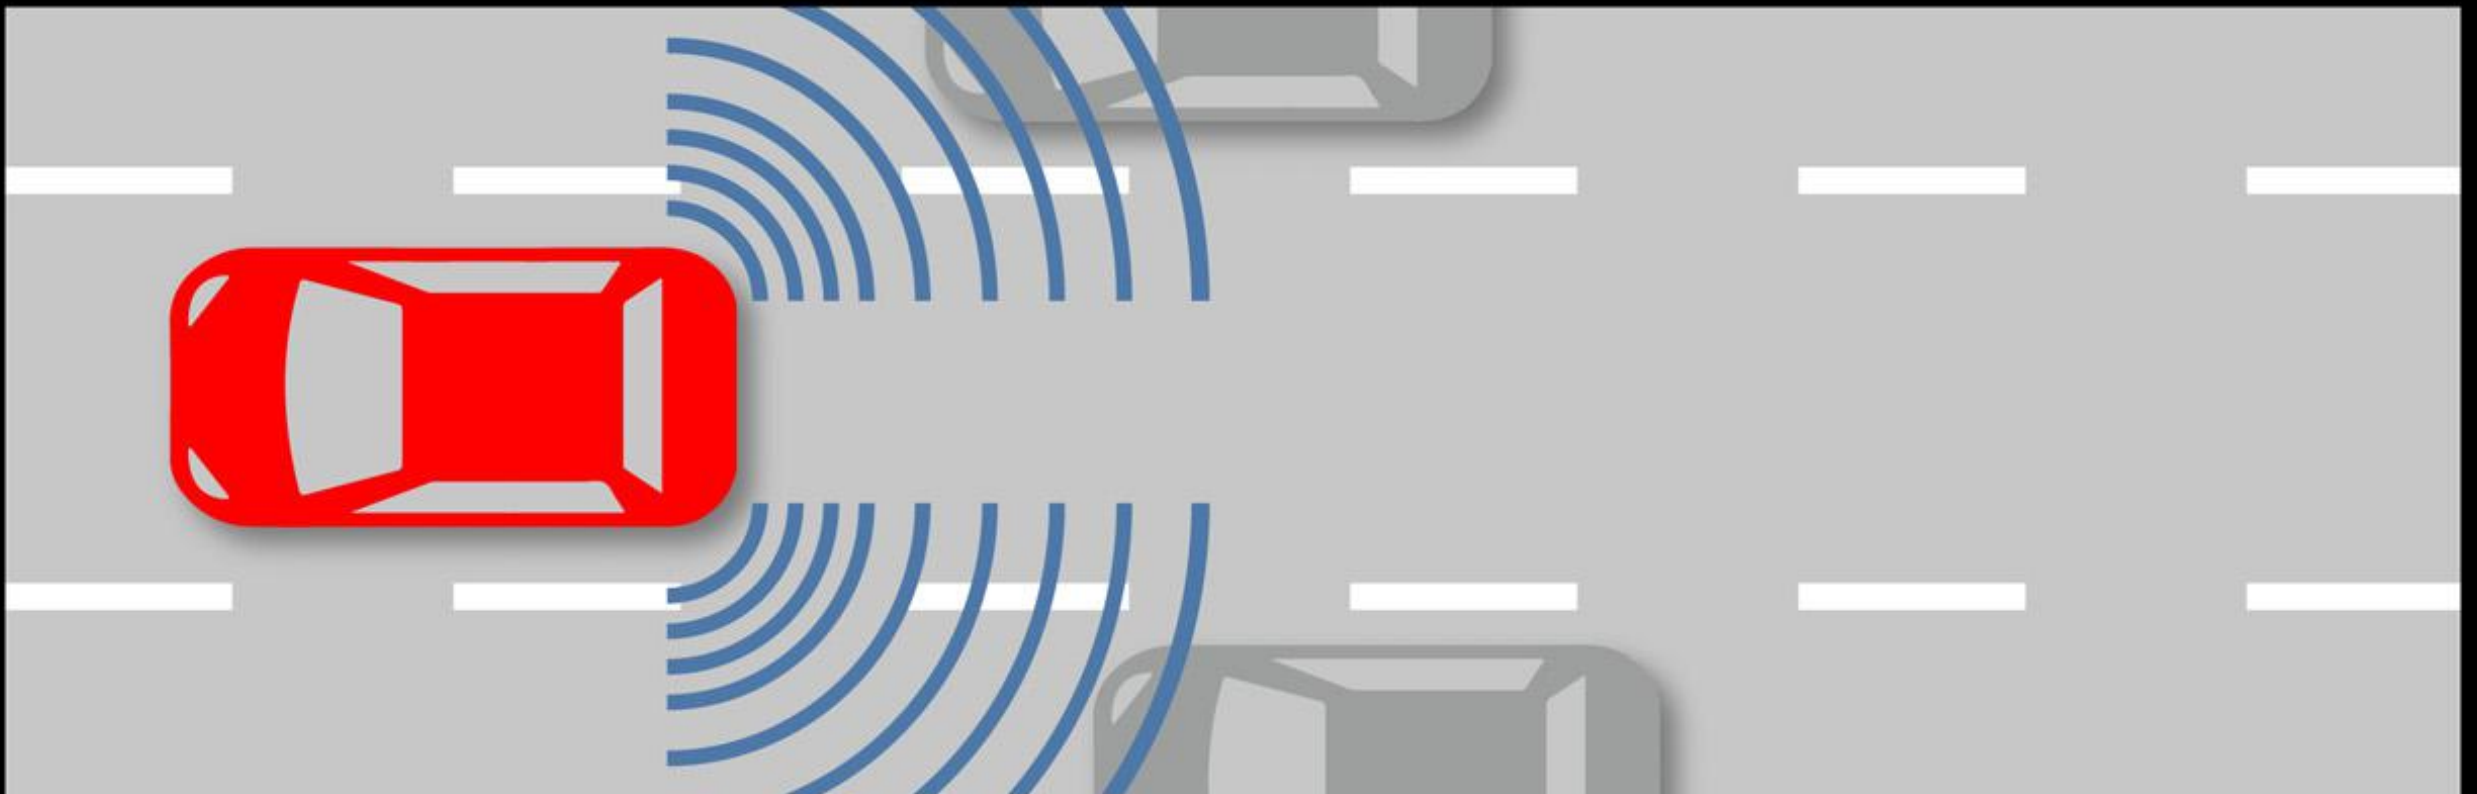

Auto High Beam (AHB) is available, which automatically turns on the high beam when there are no vehicles ahead.

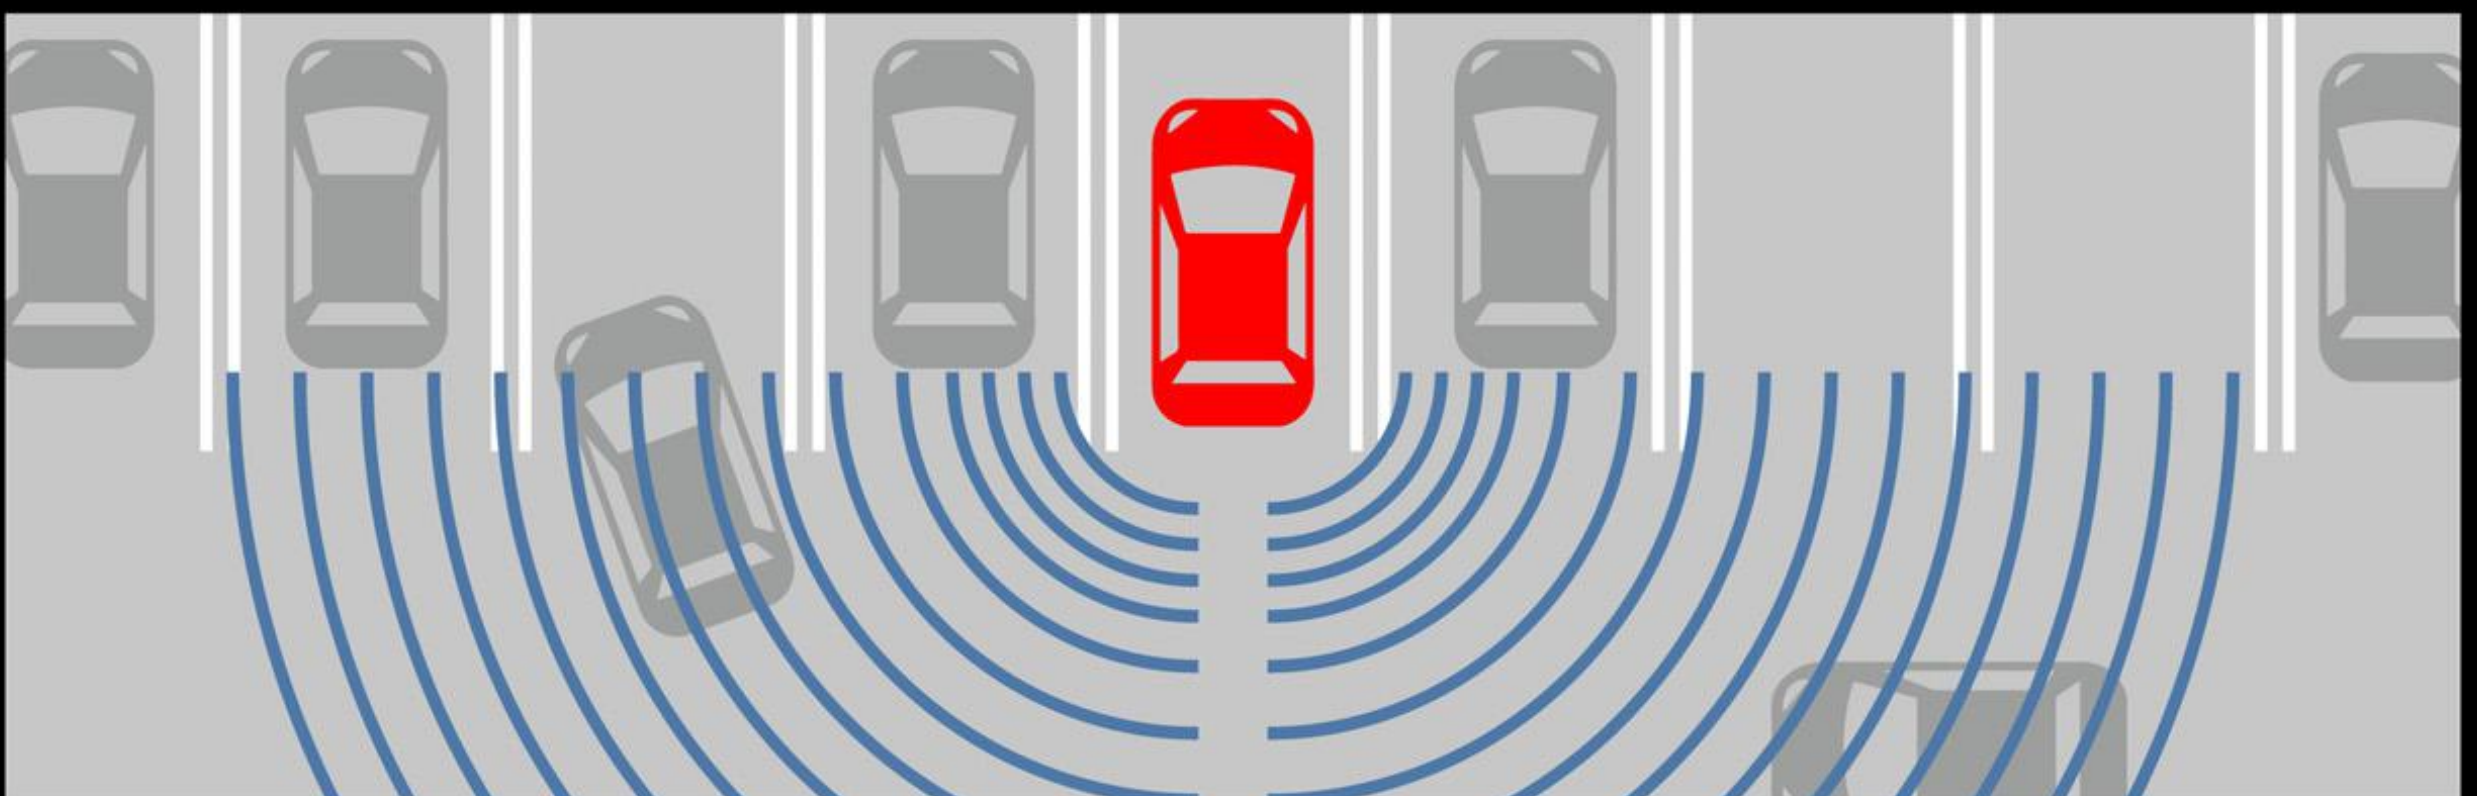

Reverse Automatic Braking

Using parking sensors on the rear bumper, the system can alert the driver with warning sounds and automatically apply the brakes to avoid collision or reduce impact.

Blind Spot Monitor

Detects and indicates to the driver if a vehicle is present in the blind spot area.

Rear Cross Traffic Alert

The system detects any vehicle close to the rear of the vehicle and notifies you using an indicator light and buzzer.

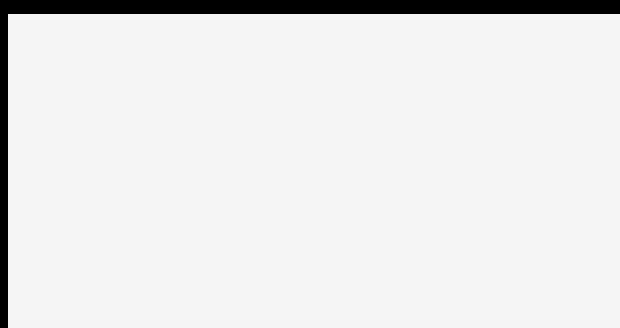

Vehicle Stability Control, Traction Control and Track Mode

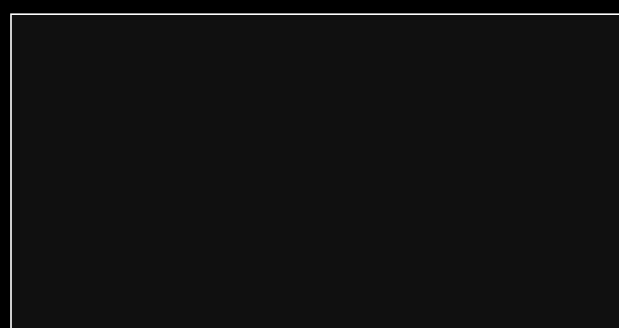

Toggle the new Track Mode to bring important information like RPM and gear into focus. Be in control on slippery surfaces and have stability when turning on a curve with Traction Control (TRC) and Vehicle Stability Control (VSC).
